

OBJECT MANAGEMENT GROUP

BPM and Standards

Richard Mark Soley, Ph.D.
Chairman and CEO
Object Management Group, Inc.

A Story from My Hometown

OBJECT MANAGEMENT GROUP

- Great Baltimore Fire of 1904
- Response from Philadelphia, Washington, New York, Virginia, Atlantic City... hundreds of firefighters
- Burned two days, 60 hectares

Standards Are Important

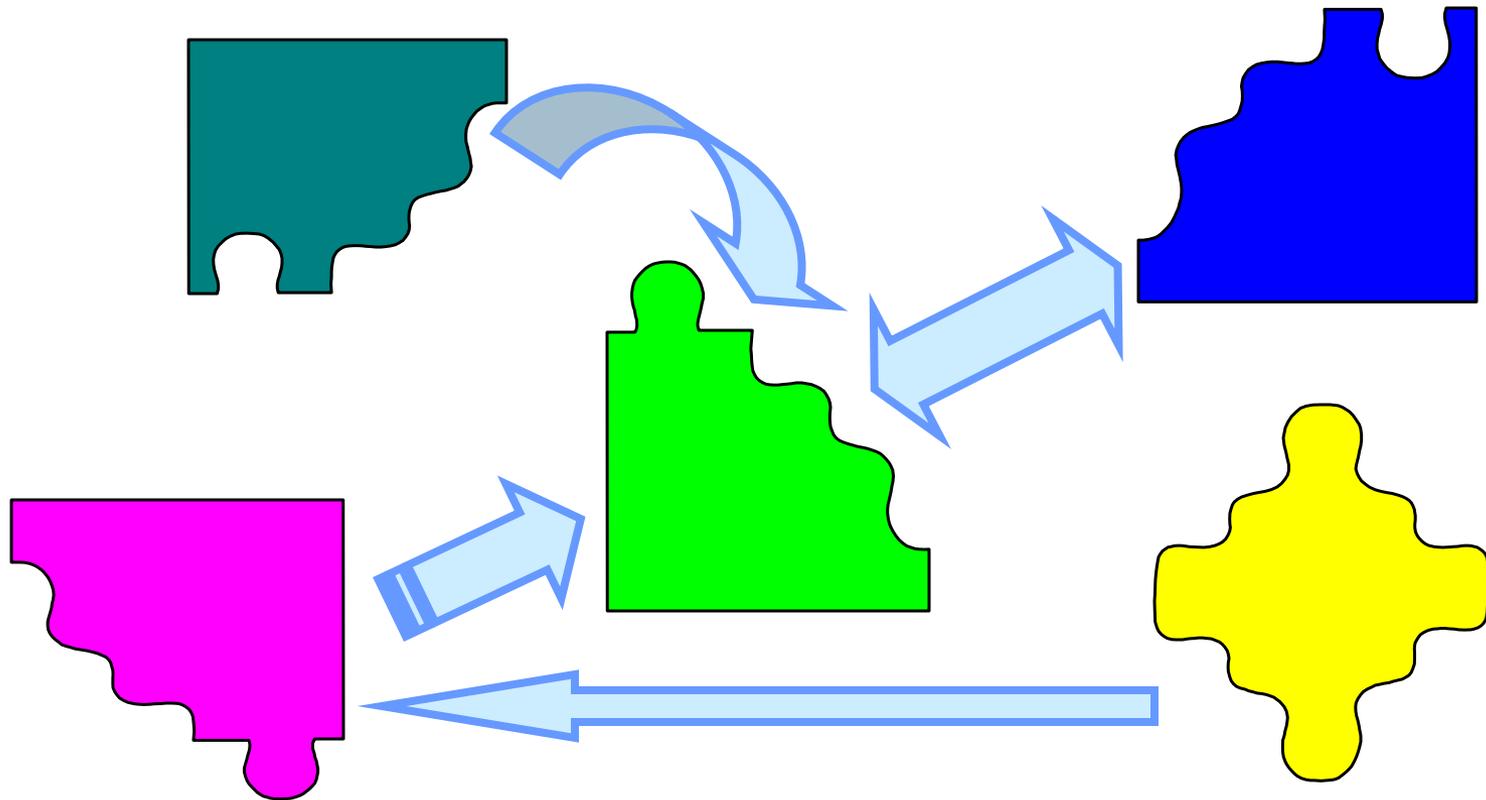

OBJECT MANAGEMENT GROUP

- Sometimes they have life-or-death consequences
- Successful standards start, maintain and build ecosystems & businesses
- Standards are product differentiators:
 - Marks of quality
 - Expertise (certification, validation)
 - Interoperability, Portability & Reuse

The integration picture is always changing

OBJECT MANAGEMENT GROUP

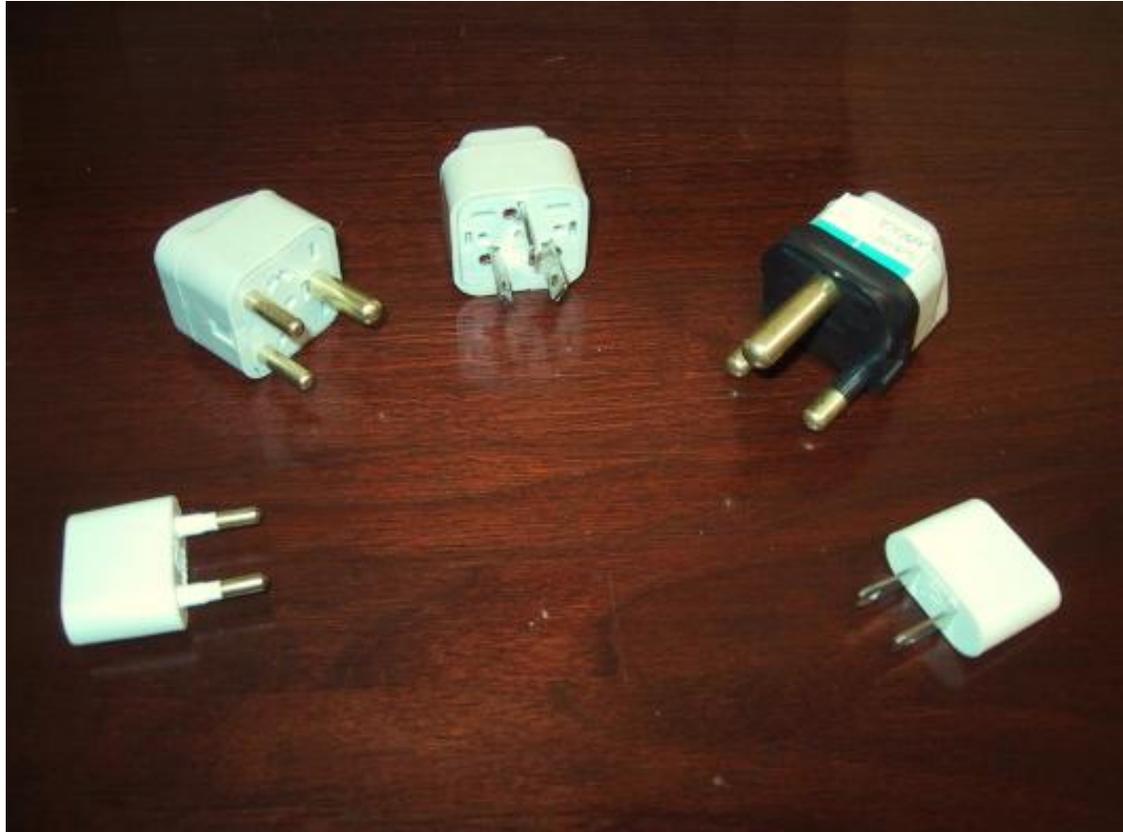

Executive decisions, mergers & acquisitions have a way of surprising us...

Bringing Down Cost of Adaptation

OBJECT MANAGEMENT GROUP

OMG's Mission Since 1989

OBJECT MANAGEMENT GROUP

- Develop an architecture, using appropriate technology, for modeling & distributed application integration, guaranteeing:
 - reusability of components
 - interoperability & portability
 - basis in commercially available software
- Specifications *freely available*
- Implementations exist
- Member-controlled not-for-profit

Who Are OMG?

OBJECT MANAGEMENT GROUP

A light gray world map is centered in the background, showing the outlines of continents and major countries. The map is used to contextualize the global reach of the member organizations listed around it.

Adaptive	FICO	Microsoft	Oracle
Atego	Firestar Software	MITRE	PrismTech
Boeing	Fujitsu	National Archives	SAP
BP Trends	Harris	NEC	Soluta.net
CA Technologies	Hewlett Packard	NIST	TCS
Citigroup	Hitachi	No Magic	Tether's End
Cognizant	Honda	Nokia	THALES
CSC	IBM	NTT DoCoMo	The Open Group
EADS	Lockheed Martin	Northrop Grumman	Unisys
Energistics	Mentor Graphics	OASIS	W3C

Shared Languages are Important

OBJECT MANAGEMENT GROUP

- The Unified Modeling Language is the successor to the dozens of OO A&D notations of the early '90s
- UML is broadly adopted, as are other key OMG modeling languages: **BPMN**, SysML, CWM, MOF, XMI
- Initial UML 1.x standardized in 1997
- Vendor-neutral worldwide certification easily available
- Standardization primed the market
 - Hundreds of books
 - Dozens of commercial tools
 - Widely available training
- Supported by an open process
 - UML 2.0 updates came from 54 companies
 - New UML 2.5 simplifies structure and makes room for the future

OBJECT MANAGEMENT GROUP

UML Certification Program (OCUP)

OMG

Endorsed!

- **OMG/UTI UML Certification Program**
 - Started November 2003
 - Worldwide (English & Japanese)
 - Books available in English, Japanese & German
 - Three levels of accomplishment
 - Focused on UML 2.0
- **Other certifications available:**
 - Realtime/embedded modeling
 - Business Process Modeling
 - Systems Engineering (2010)

BPM Certification

OBJECT MANAGEMENT GROUP

- OMG-Certified Expert in BPM (OCEB) is available in English and Japanese
- Enables organizations to find & qualify expertise
- Enables individuals to show what they know

OMG Business Modeling Activity

OBJECT MANAGEMENT GROUP

- Semantics of Business Vocabulary and Rules
 - Consistent rules at the business level
- Business Motivation Metamodel
 - Capturing business focus at the strategy level
- Business Process Modeling Notation
 - World standard for process description
- Business Process Definition Metamodel
 - Connecting BPMN to metamodeling frameworks
- Production Rule Representation
 - Low level rule descriptions
- Business Process Maturity Model
 - Consistent five-level metric for organizational maturity

BPMN: A Core Example

OBJECT MANAGEMENT GROUP

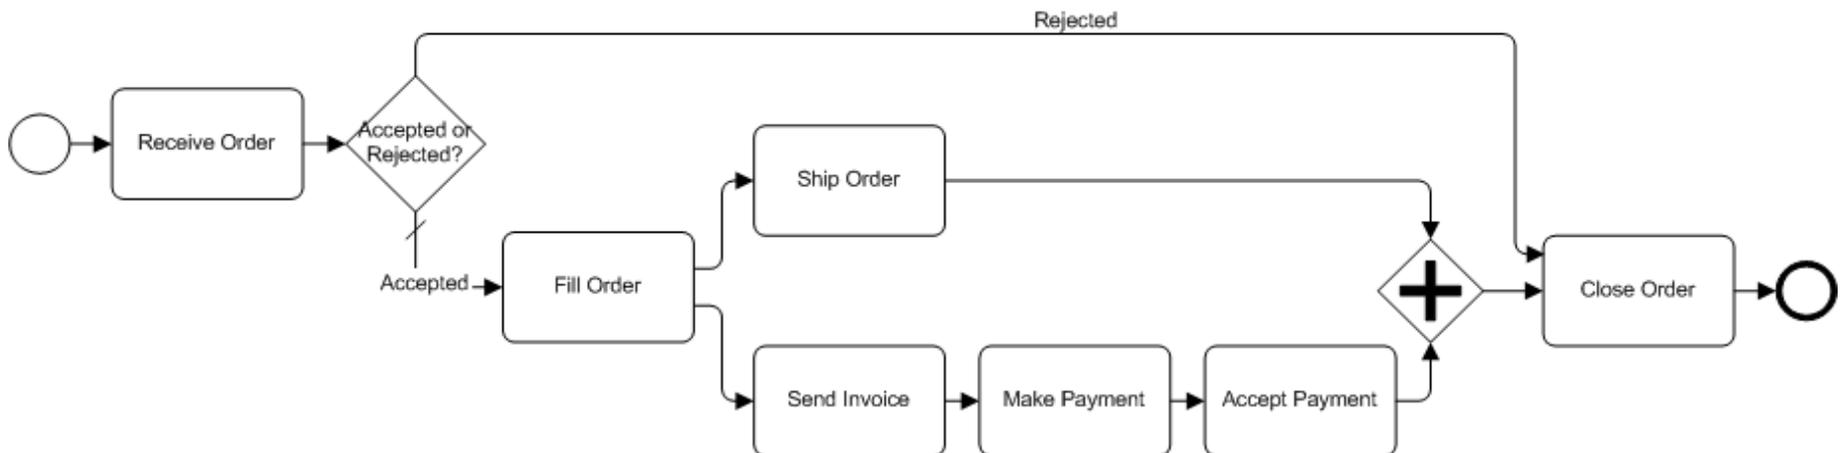

- BPMN was designed to bridge the gap between business process design and process implementation
 - To support both abstract and executable processes: not just automation
- BPMN is supported by more than 40 vendors
 - Process engines support BPMN natively
 - Tools map BPMN to BPEL and other execution languages
 - Also in use by BPM practitioners in the end user community

Status of the Standard

OBJECT MANAGEMENT GROUP

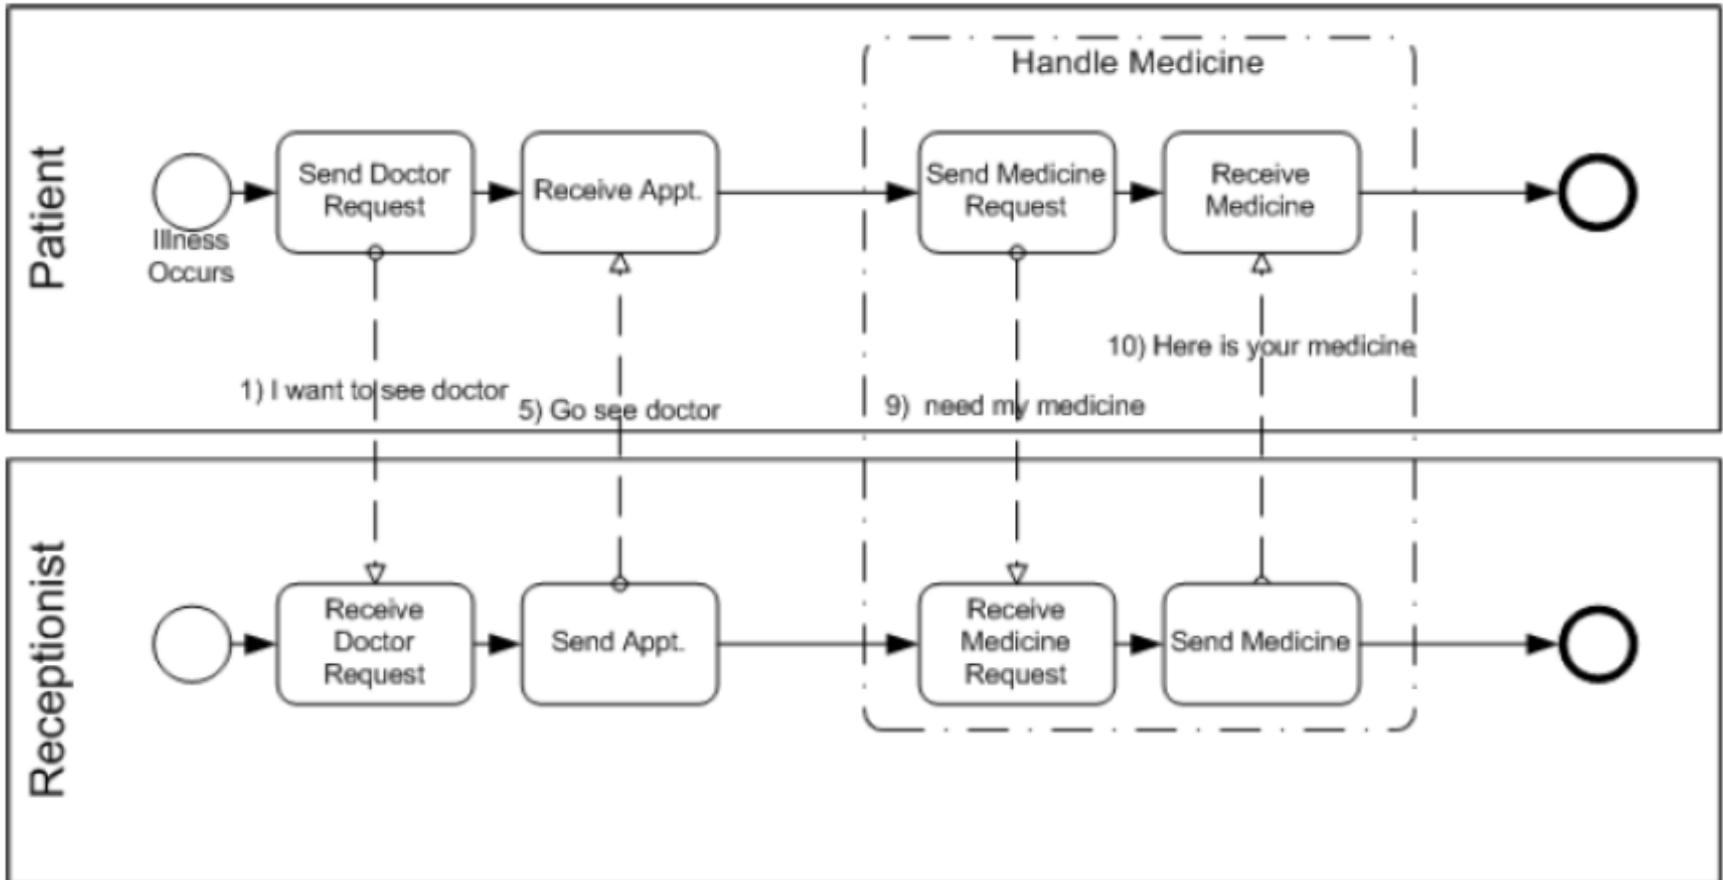

- BPMN 1.0 originally released by BPMI in May, 2004
- Fast-tracked by OMG, adopted in only 90 days after merger
- BPMN 2.0 adopted by wide user/vendor base in September, 2009
- Specification & information at <http://www.bpmn.org/>
- Five things to love: <http://www.brsilver.com/2009/03/26/5-things-to-love-about-bpmn-20/>
- One thing to adore: model interchange

Simple & Straightforward

OBJECT MANAGEMENT GROUP

Gartner on BPM

OBJECT MANAGEMENT GROUP

- Gartner 2009 worldwide CIO survey: top three CIO priorities are
 - Business process improvement
 - Reducing enterprise costs
 - Improving enterprise workplace effectiveness
- “By 2013, graphical models of processes, data, services, user experiences and workflow will be used in more than 80% of new compositions.”
- “Big Breakthrough: Model-Driven Business”

Janelle Hill, Gartner (February 2009)

Future of the IT Department

OBJECT MANAGEMENT GROUP

- The successful 21st century organization will no longer have an « IT » department
- IT's success means moving from « partnership » and « alignment » to *an integral part of the business organization*
- Our role: *recognizing, precisely defining, capturing, storing, reusing and **optimizing** business processes*
- Optimization is a precursor to **innovation**

Who Knows?

OBJECT MANAGEMENT GROUP

- Most divisions only know their own sales, development, operations
- Because IT automates processes throughout the enterprise, IT knows the enterprise
- Most importantly, IT implements *business processes* that support *business capabilities*

fig. 07
Crowson Brain

Optimizing the Enterprise

OBJECT MANAGEMENT GROUP

- Precise descriptions of business processes are a prerequisite to *understanding* those processes.
- IT understands business process optimization: streamlining processes, leaning processes, greening processes
- Digital ecosystems require representations of digital business models

OMG's Breadth of Standards

OBJECT MANAGEMENT GROUP

- Besides key modeling, distributed computing & realtime/embedded standards, OMG develops standards in

Healthcare	Financial Services	Telecommunications
Government	Military Logistics	Manufacturing
Robotics	Systems Engineering	Military Communications
Consumer Device Safety		Electric Grids

...Common Business Processes

Action Plan

OBJECT MANAGEMENT GROUP

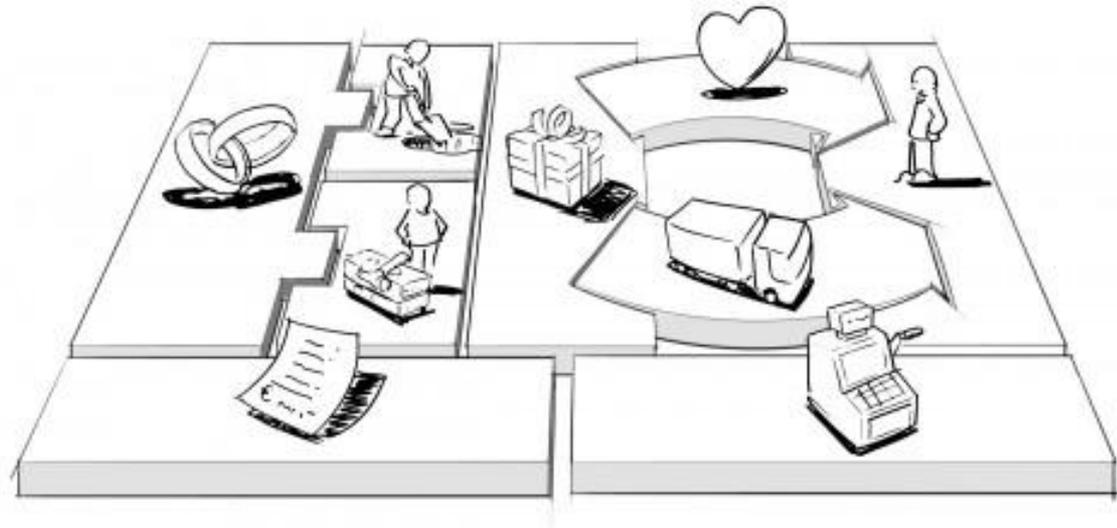

- Speak the language of the business, and focus on business capabilities
- Share experiences, both good and bad, with your peers in your vertical and others
- Leverage and participate in the definition of standards for your company, your market, your vertical, and across the industry
- Be the process improvement expert in the business
- Look for opportunities to optimize, not just automate
- *Optimize across your supply chain to find opportunities to innovate*
