

# From Hype to Insight

Transforming industries with insights gained  
from the Internet of Things

Brian Dalgetty

*Director, Internet of Things,  
IBM Analytics BU Marketing*

#IoTnow

Enabling our clients  
to capture IoT  
opportunities

# Instrumented Interconnected Intelligent

Data

Cloud

Engagement

Data sources are diverse  
and accelerating

# The Insight Economy

Internet of Things are  
impacting industries

Better business performance from  
insights and interaction

# Yarra Trams

*IBM Solutions for the Internet of Things Keeps Yarra Trams Running on Time, Rain or Shine*

## Predictive Maintenance

for a fleet of 8 different difference classes of trams, dating back to 1939

## Safe and On Time

even when passenger traffic increases.

## Data Analytics and Insight

sourced from 91,000 different pieces of equipment – from trams to power lines and tracks.

# GSA's GSAlink

*Enabling building management teams to reduce energy consumption and optimize facility operations*

81 buildings integrated nationally, comprised of 47M sqft

Over 11,000 pieces of equipment and 70,000 sensors polled every 5 minutes

GSAlink won the 2013 FedScoop 50 Innovation of the Year Award

GSA has exceeded its initial goal of saving \$13M during first 16 months

Saved 12% of Energy Costs

# A global agricultural company

*Couples analytics and engineering to dramatically increase crop yield*

## Higher yields

20% increase in yield per acre  
with 15% less water

## Improved crop quality

and crop consistency leading to  
superior product

## Pratt & Whitney

*Aircraft engine manufacturer, uses predictive analytics to prevent costly aircraft-on-ground engine events*

**97% prediction**

ability to predict delays & cancellations within 12 weeks

**97% accuracy**

ability to predict an in-flight shutdown within a year

# Jaguar Land Rover

*Accelerates time to market for in-vehicle infotainment systems*

**90% decrease of  
software validation time**

from 6 weeks to 3 days for positive  
test cases

**90% reduction in  
bug-detection time**

from manual 3 days to 30 sec of  
automated detection

**Accelerates time to market**  
for its in-vehicle infotainment systems

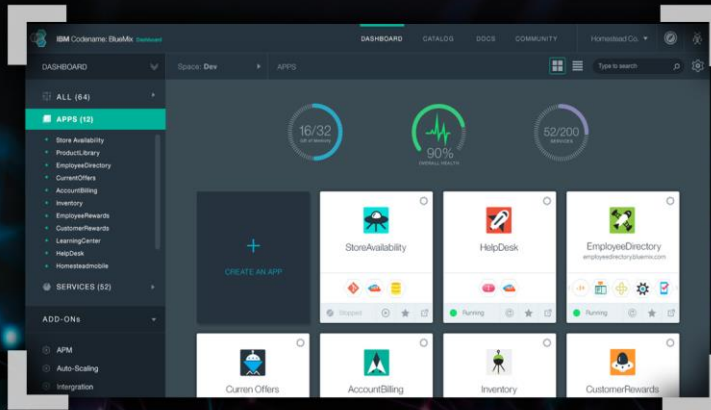

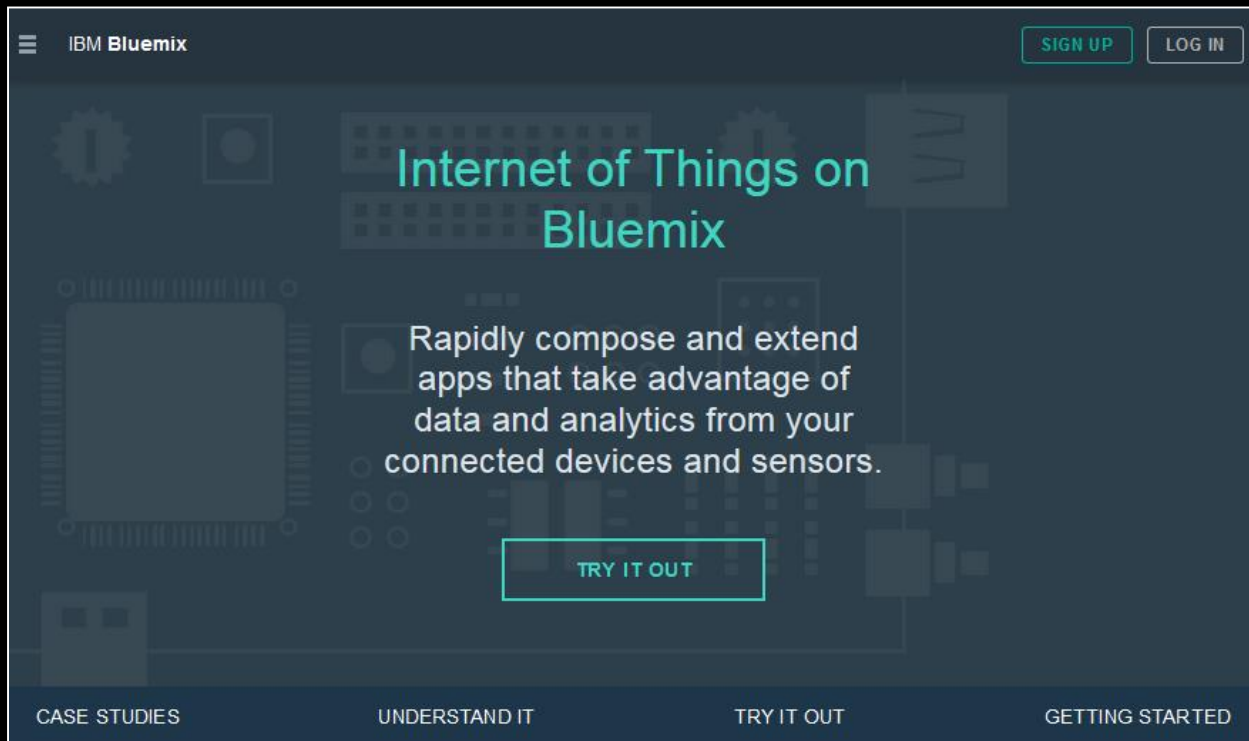

IBM Bluemix™

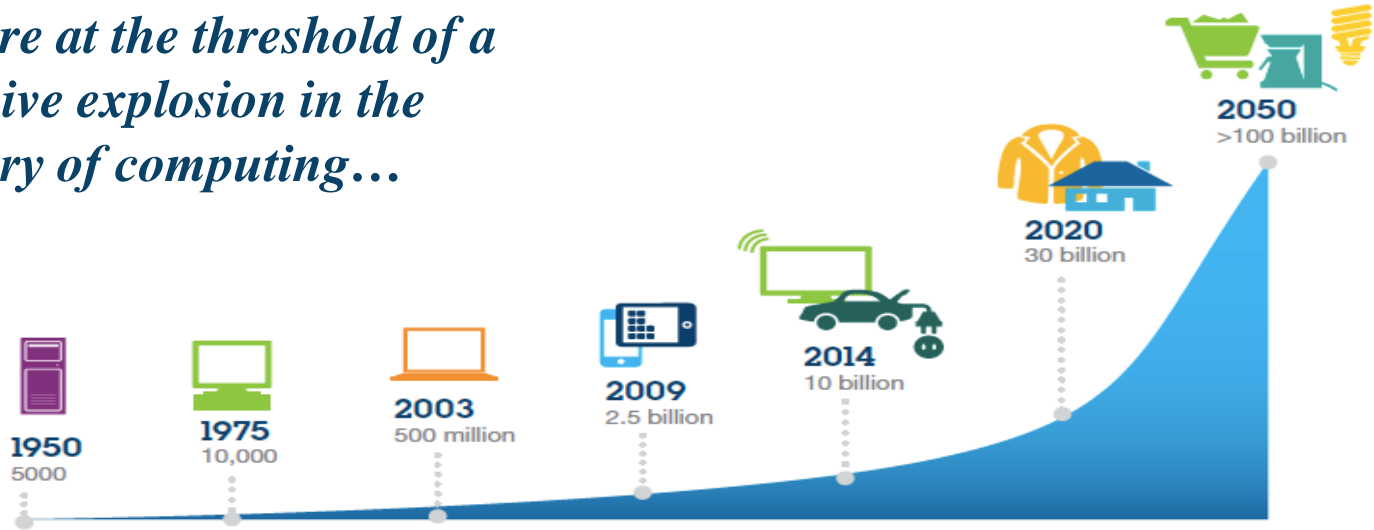

**Bluemix bringing together  
speed and agility & enterprise scale**

# The Future of the Internet of Things

*We are at the threshold of a massive explosion in the history of computing...*

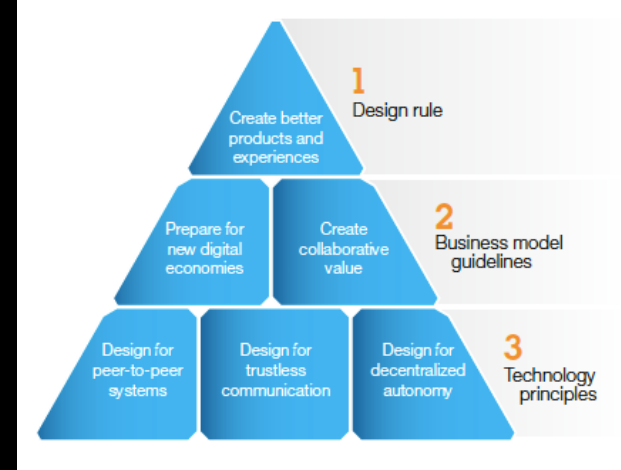

*Devices on the edge are becoming significantly more intelligent and connected*

# As the IoT scales, decentralized systems have the potential to complement current approaches to the IoT

Challenges in scaling the IoT

A strong technology foundation

IBM Institute for Business Value Executive Report “Device democracy - Saving the future of the Internet of Things”, published Sept 2014  
<http://www-935.ibm.com/services/us/gbs/thoughtleadership/internetofthings/>

# IBM and Samsung collaborated to demonstrate devices engaging autonomously in IoT marketplace transactions

*A Samsung W9000 washer participated autonomously in consumables, service and energy marketplaces*

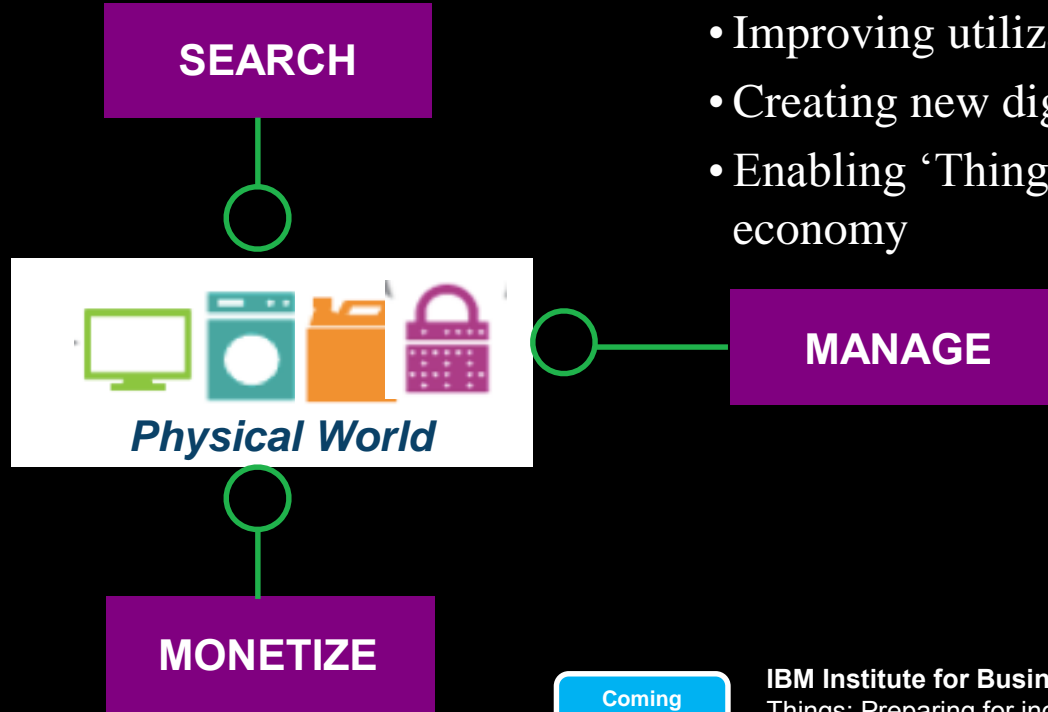

- Autonomous detergent reorder
- Autonomous service parts reorder
- Autonomous power usage negotiation

*Samsung LFDs participated autonomously in a decentralized advertising marketplace*

- Autonomous advertising marketplace

# By transforming devices into points of transaction and value, the IoT will create a new Economy of Things

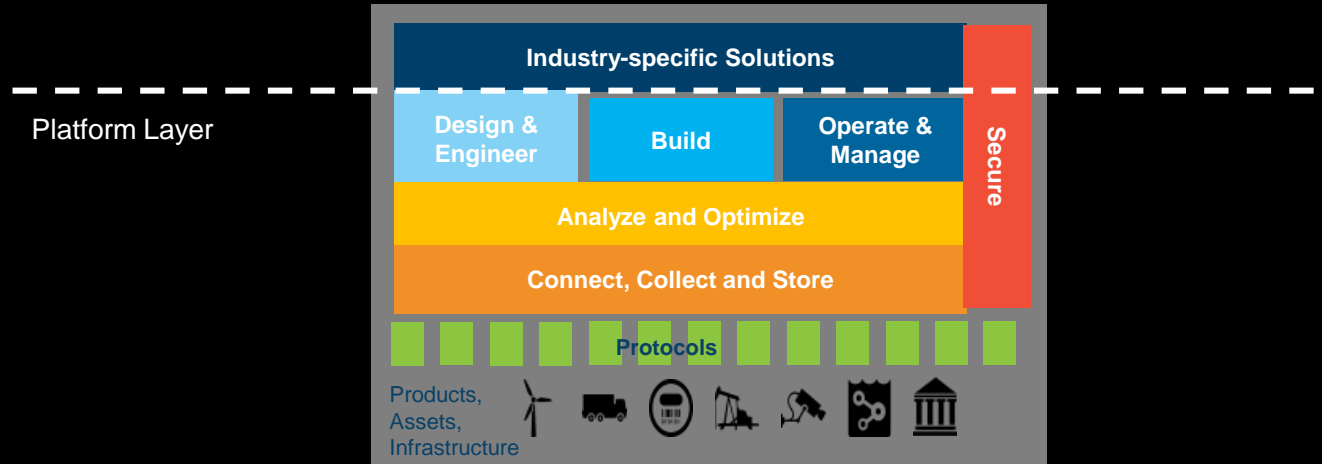

- Improving utilization of physical assets
- Creating new digital marketplaces
- Enabling ‘Things’ to participate in a new digital economy

Coming  
soon

IBM Institute for Business Value Executive Report “The Economy of Things: Preparing for industry transformation by the Internet of Things”, publishing 2Q 2015

# IBM IoT solutions deliver value through industry specific analytics built on a foundational enterprise capabilities

# It's Time To Get Started
