

Agile Journey

Juan Vicente Vargas

Ingeniero en Ciencias de la Computación

MBA con Énfasis en Gerencial Industrial

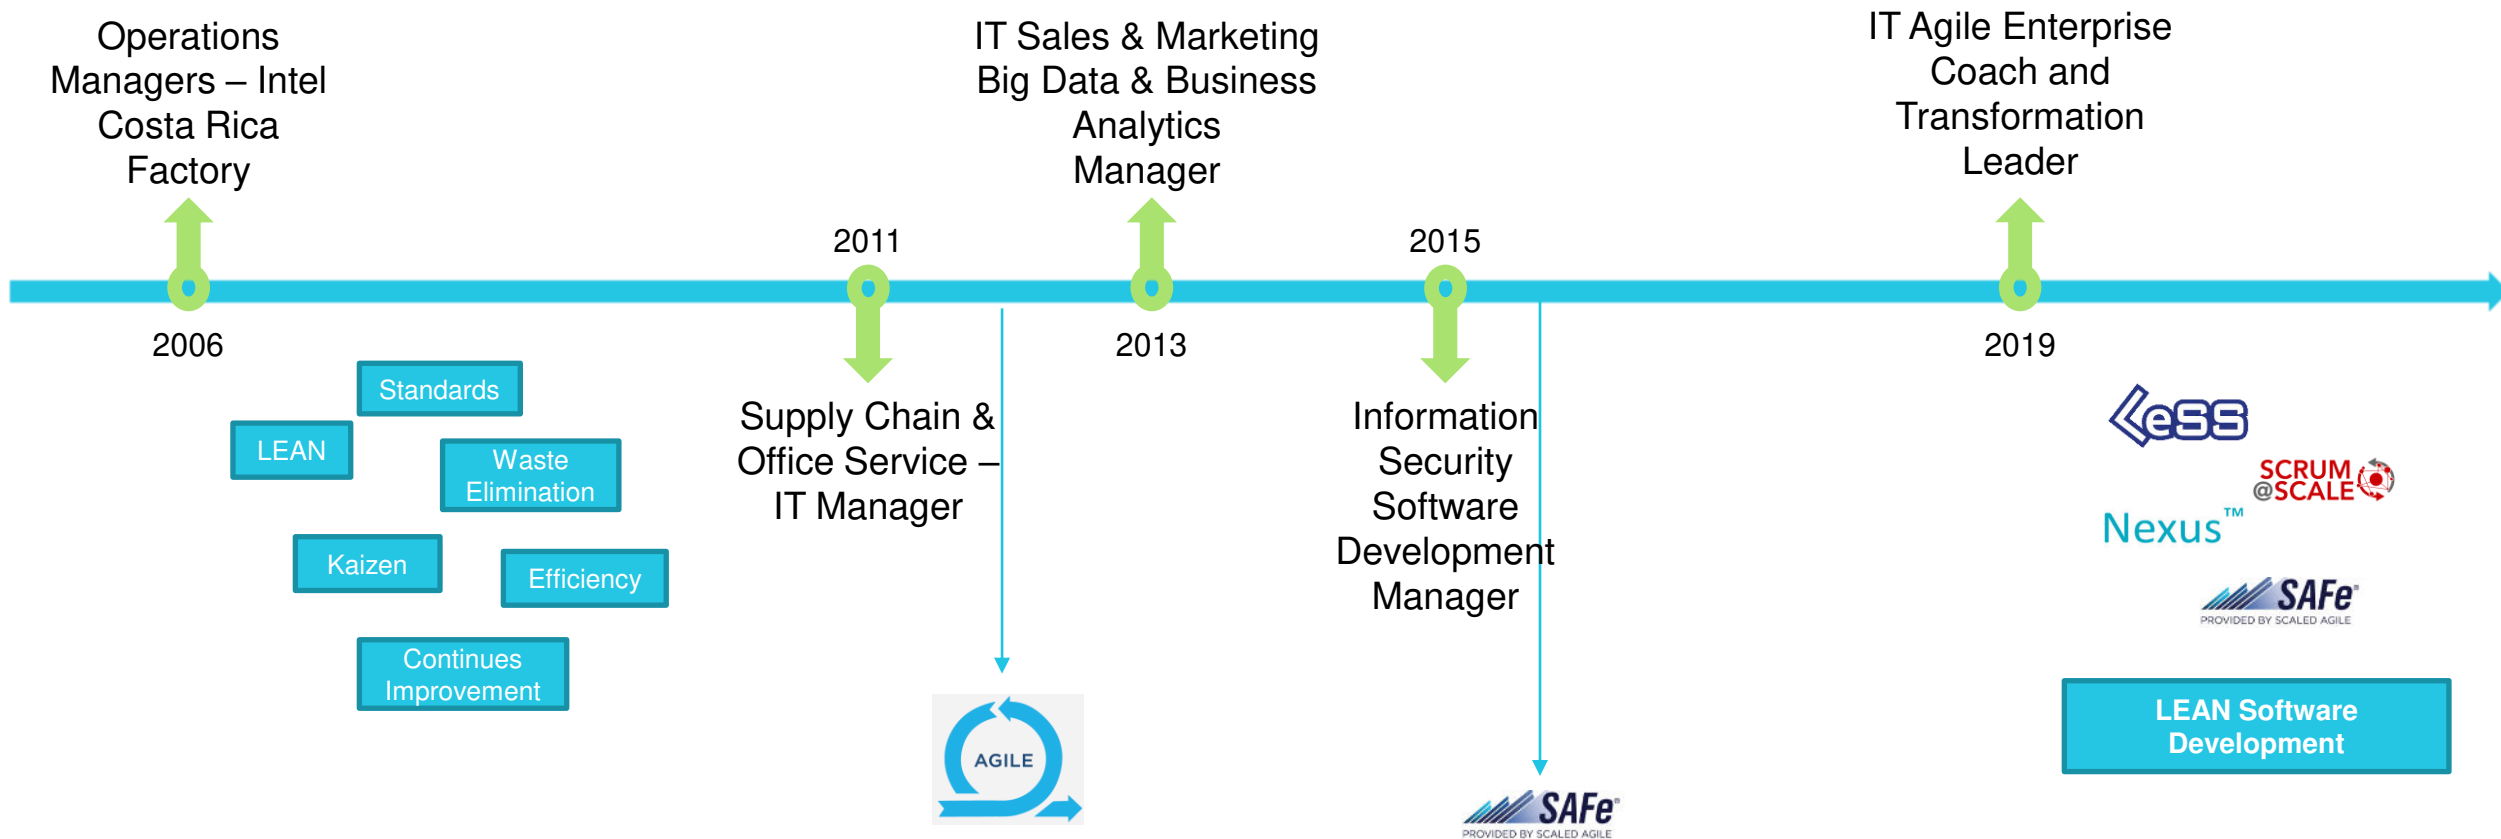

SAFe Program Consultant

Scrum@Scale Practitioner

Certified Scrum Master

Lean Software Development

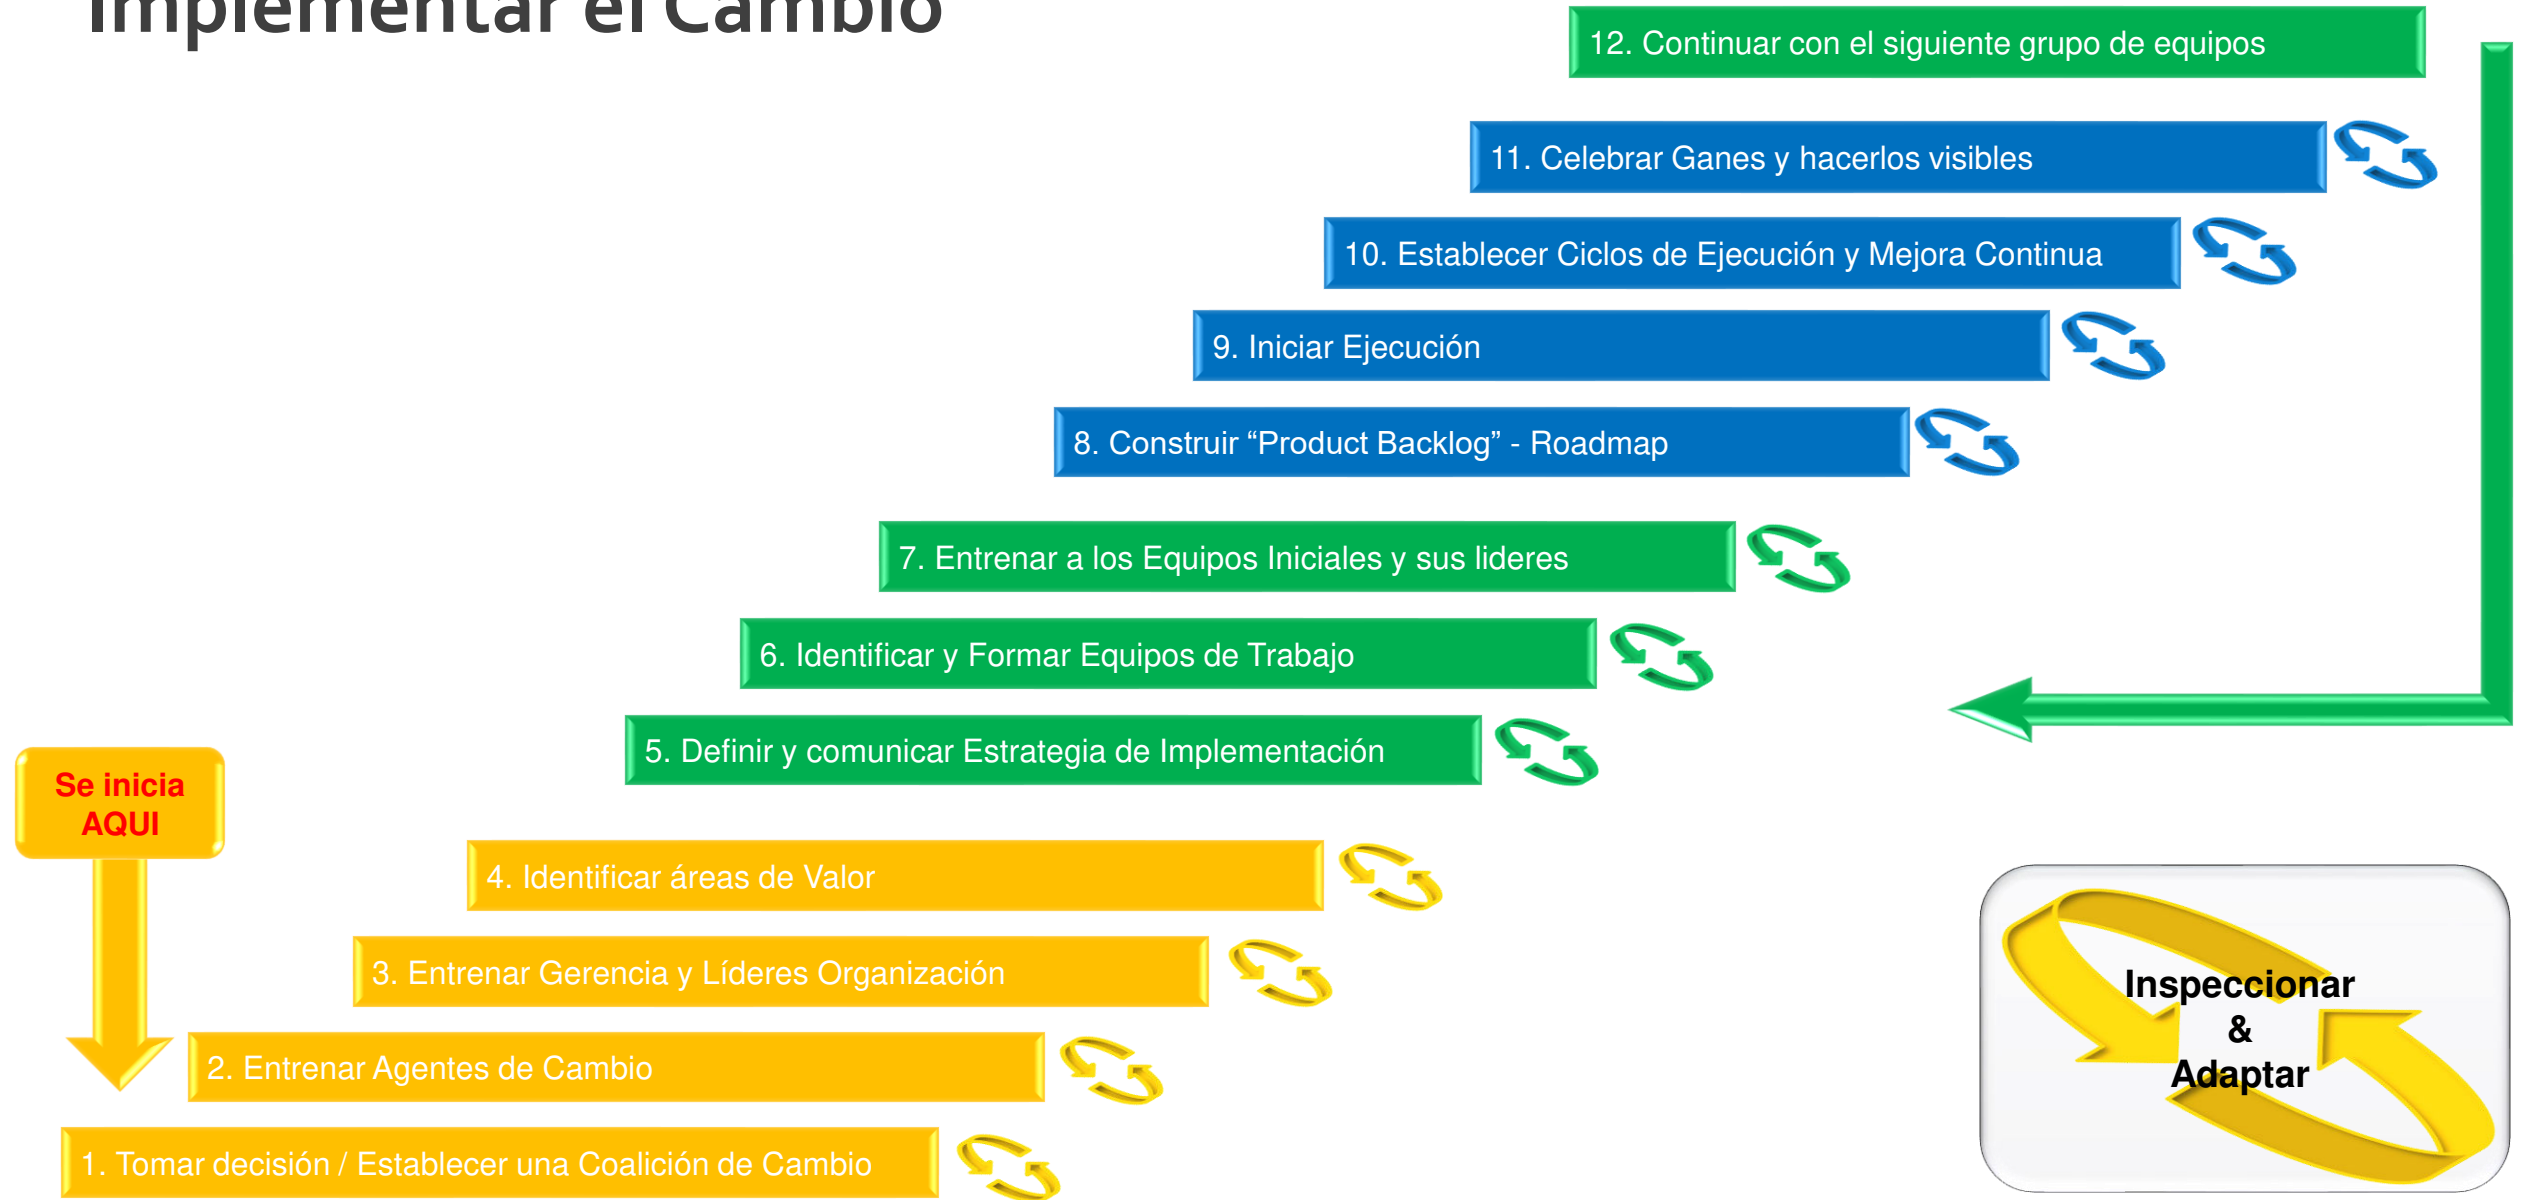

Mi historia en el mundo "Agile"

Liderar el cambio

Implementar el Cambio

Apredizajes

- El **cambio se debe liderar** junto con todo el proceso de transición
- Agile es un cambio de cultura – para cambiar la cultura hay que cambiar los comportamientos primero
Mindset – Skillset - Toolset
- “**Executive Sponsorship**” tiene que estar sólido – sin esto, **NO** se puede hacer el cambio
- El “**nuevo**” **role del Gerente** del equipo cambia y por lo tanto, los gerentes deben cambiar primero
- Para hacer Agile efectivamente, la **formación/diseño** adecuado de los equipos es fundamental (localización, tamaño, roles, enfoque, conocimiento, liderazgo)
- Enfocarse en hacer una **implementación perfecta es un grave error** – Inicie con el área “fácil” de implementar y continúe avanzando mientras aprende y ajusta (quick wins!)

Gracias!!!

BACKUP

Qué es Lean?

Lean is...

**the relentless pursuit of
adding value for the customer,
eliminating waste, and
continuously improving from a
baseline at the point of activity
by everyone, everywhere, every day!**

Defining Lean Leadership

Lean leadership is ...

the process of developing skills and equipping people to apply
lean thinking
on their own in any situation

Every manager, supervisor, staff member, technical lead, product owner, scrum master, team leader, program manager, principal engineer, etc. in the organization.

Changing Myself

The Leadership Change Continuum

Make it Personal

Propose Change

- Suggesting a change may be necessary
- Offering potential solutions or directions
- Encouraging others to consider changing

Proclaim Change

- Declaring a new direction
- Setting expectations for new objectives
- Describing new desired behaviors

Promote Change

- Marketing the new approach through communications channels
- Holding up early wins as evidence the change is working
- Reinforcing new behaviors through reward systems

Personally Participate, Engage, and Change

- Attending training and being visibly supportive of the new direction
- Changing the way you think, work, and interact
- Changing how and where you spend your time
- Not just “doing things different” but “being different”
